Network Cabling Services

We install network and voice cabling including Cat5e and Cat6. Whether you need a single cable drop, DMARC extension, or need to cable the entire office complex, we can handle it all.

Our installs may also include network racks, patch panels, wall plates and/or surface-mounted modular boxes. All of our cabling is guaranteed, tested and error-free. We can also troubleshoot and test existing cable installations.

- Voice, Data, COAX
- Wireless Devices
- Racks & Patch Panels
- Cable Management
- Point-to-Multipoint Antennas
- Testing/Certification Up to 10 Gigabit

Video Surveillance Solutions

Our decentralized architecture increases reliability and reduces system costs for high-quality video performance and low bandwidth.

The IP cameras themselves execute video analysis and event-detection internally, and manage their ring buffer on a NAS or server by themselves. This reduces the workload of the VMS workstation and network dramatically.

- Access Control
- IP Surveillance Cameras
- Network-attached Storage
- 360° Hemispheric IP Cameras
- Dual-Thermal IP Cameras
- Facial Recognition Detection
- Video Analysis/Behavioral Detection

*Please ask our representative how you may qualify to receive a **10% Discount** on the liability portion of your insurance policy.*

Telephony, Intercom-To-Phone

The telephony world is undergoing a revolution. Yesterday's traditional PBX phone systems are giving way to a more sophisticated IP-based telephony systems and unified communication platforms.

ABS has positioned itself as a leader in helping organizations apply new telephony capabilities to companies. This process helps them to save money and benefit from the convergence of data and voice in the new IP-telephony world. Both hosted and managed solutions are available.

Our unique telephone entry system is the perfect solution for commercial property managers. We can program our equipment to call up to 2,000 different tenants using their existing telephone numbers. The tenants will also be able to answer a call from their visitor and unlock the entry door by entering a code on their phone.

Instant auditable and silent visual alert solutions are also available in situations where exit/entrance doors are often left open.
