FACIAL RECONGNITION TIME CLOCK

FEATURES INCLUDE:

❖ Dual cameras for induction and verification.

❖ Fast facial scan in less than 1 second
❖ LCD Touch Screen for easy navigation
❖ Transfer data via USB Flash Drive or network
❖ Accepts up to 500 users
❖ NEW - Also accepts proximity cards

PRODUCT OVERVIEW

Our leading facial recognition time clock is designed for ease of use and Powered by the Bio NANO core algorithm. This Facial Recognition System ensures touch free identification in less than one second. The infrared light source enables the terminal to perform well in all light conditions, even complete darkness. The elegant design works with all users, regardless of complexion, facial hair or facial expressions.

Keeping track of employee's hours is one of the most important parts of your business. You want to make sure you are billed for the right time, but you do not want to be cheated either. The process should be simple, fast and efficient, and that is exactly what we had in mind when we developed our Time & Attendance Software.

Combined with our *state-of-the-art* fingerprint clocks, our Made-in-USA software can reduce your monthly payroll costs by 10% to 20% which, in turn, adds profit to your bottom line every month! This truly is a product that will pay for itself. Explore all of the features, screenshots and options that our software has to offer.

Payroll Provider Upgrade

Export your employees hours and payment information to QuickBooks, ADP, PAYCHEX, CVS, Heartland, GMS, CheckMark, TotalTrack, CPI or Replicon. Our software generates compatible payroll files that can then be easily imported into your third Party Payroll Providers application.
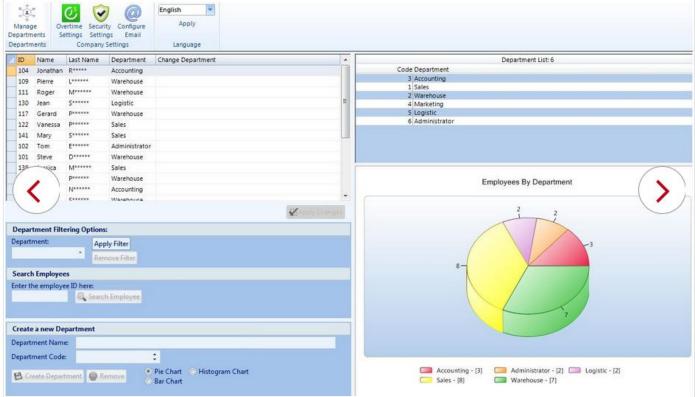

Security Upgrade

Create multiple software administrators with multiple levels of permissions: User permissions can be defined to allow or restrict access to Employee Control, Device Management, Reports, Exports and/or specific Departments. Furthermore there is a footprint, so that you can easily identify if a record was modified and by whom. This feature also provides the ability to install and activate the software for up to 5 users. The database folder can then be centralized in a shared location on your network, so software points and synchronizes are to the same database.
