OVERVIEW

This uniquely designed Surveillance Bird House (SBH) is fully functional as a Bird House and Surveillance System to protect your property. It is handcrafted and made in the USA using Native White Pine. It contains all non-toxic materials, machined, nailed and glued to last for many years of enjoyment. Any camera chamber can be reconfigured, *prior to purchase*, for use by the birds. All chambers include easy access.

Coordinated with a local Audubon Society, SBH was designed for use by the Black Capped Chickadee. The exterior is sealed to protect against weather and built to last with spacious living quarters for the birds.

RECOMMENDED MOUNTING

Our exclusively designed SBH includes a recommended exterior mount for installation on your property, (*see the reverse side of this document for more details*). As stated, this is only a recommended mount however you may choose other types of mounting methods.

CAMERAS

You can order our exclusive SBH with 1, 2, or 3 Full HD 1080p Camera(s). This unique surveillance -

CAMERAS

system is also motion activated, provides instant playback, and other unprecedented features like no other in the market today!

The complete SBH System can be accessed *real-time* from any mobile device, MAC, or PC with a single Static IP Address from your local Internet Service Provider.

NVR

A Network Video Recorder (*sold separately*) digitally stores your video for up to 30-days depending on the settings you choose and the motion sensitivity selected once installed. You can instantly download video clips from each camera to a flash drive that can be used as admissible evidence in a court of law with a date and time stamp on the video to support evidence of vandalism, theft or even stocking.

BIRD HOUSE MAINTENANCE

Vented slots in the upper bird house chamber were designed to prevent heat buildup. Drain holes are located in the bottom floor with a removable rear panel that can be open for easy clean out.
