

ROCK SOLID SAFETY & SECURITY SOLUTIONS

Committed to Helping Protect People, Property and Businesses

THE INDUSTRY: RETAIL

According to Retail Security, shoplifters and dishonest employees stole over \$6 billion from 24 major US retailers in 2011. These 24 surveyed retailers also apprehended over one million shoplifters and dishonest employees and recovered more than \$161 million from them.

CHALLENGE

Security is often a major issue for many retail stores because they are often a target for creative thieves. Even an unsophisticated or inexperienced thief may find some stores to be an easy pick. Many retail stores operate on an honor system, with the customer choosing his/her purchase and paying on their way out. However not all store losses (known as shrinkage) come from customers. Store employees themselves can sometimes be dishonest, and many store losses can come from within.

SOLUTION

The most cost-effective way to help eliminate theft in your business is to have ABS cameras positioned effectively to record high-quality video that is permissible in court. Our integrated digital video security surveillance solutions can monitor your business activity 24/7 with a permanent digital recording. Video clips can then be immediately exported to DVD or USB for any police investigation required.

PROTECTION & PEACE OF MIND

With **Rock Solid Safety & Security Solutions** from ABS, we can provide solutions for unique retail requirements to protect your people, property and business in one or multiple locations that can be monitored remotely. A single high-speed Internet connection (*static IP address*) is all you need to watch on a mobile device, tablet, or computer for greater peace of mind.
