

FOR SENIOR LIVING

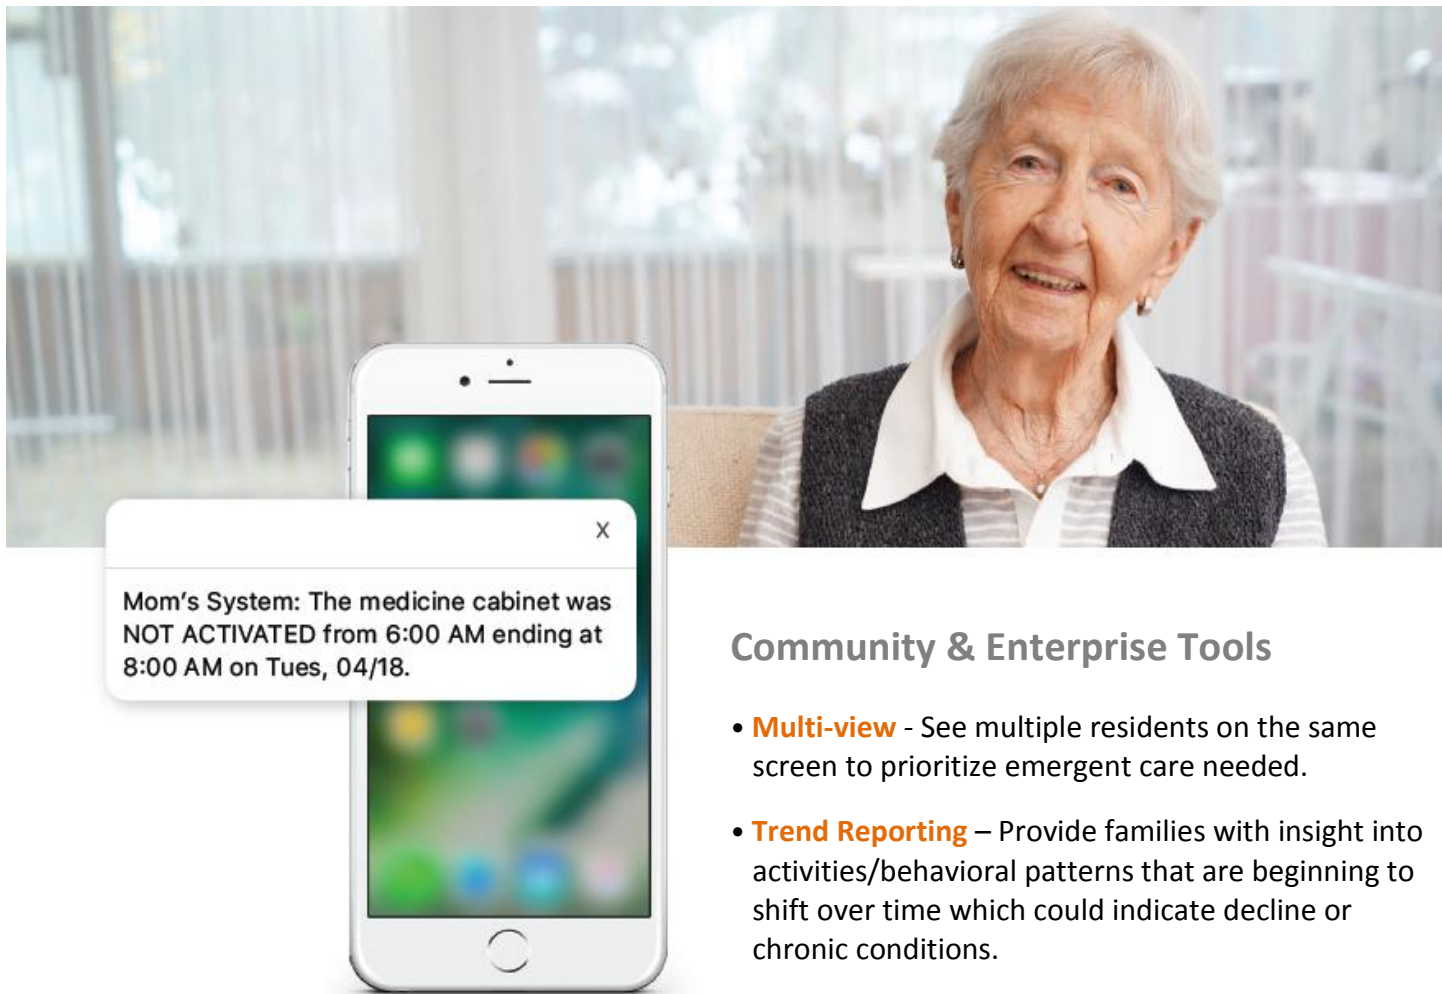

# AFFORDABLE RESIDENT-CENTERED CARE TECHNOLOGY

Wellness, from ABS, provides resident activity tracking, enabling your staff to provide customized care in an easy, affordable way. Get started without the headaches of restructuring or reorganizing. Our support team helps you integrate Wellness technology into your current operations.

- **Create staffing efficiencies** to maintain operational costs through population management.
- **Offer evidence-based data** to support changes in levels of care.
- **Provide enhanced, individualized support** across the care continuum.
- **Leverage customized trending analysis and early detection of changes** in Activities of Daily Living (ADLs) to achieve improved outcomes.
- **Differentiate your community** in the competitive marketplace.

## Community & Enterprise Tools

- **Multi-view** - See multiple residents on the same screen to prioritize emergent care needed.
- **Trend Reporting** – Provide families with insight into activities/behavioral patterns that are beginning to shift over time which could indicate decline or chronic conditions.

## Notifications & Alerts

Our innovative technology allows you to customize notifications and alerts to let you know if there is a change in routine or a safety concern. If something is out of the ordinary, caregivers and staff are alerted via e-mail and/or mobile device.

Bed sensors make it easy to see if Mom got out of bed this morning

Alert buttons can be placed in high-traffic areas of the home
