

On-location

Whether unveiling exciting new products or motivating hundreds to excellence, you can count on ABS Technologies to provide you with unsurpassed technical experience, creativity, and dedication to customer service.

Your time, message, and reputation are critical. ABS partners with clients to inspire, inform, entertain, communicate, educate and motivate. Be seen anytime. Be heard anywhere in the world LIVE or On-Demand!

Even as the audio-visual world constantly pushes the envelope of technological skills today, it is still the videotape format that remains the strongest weapon in any business presentation arsenal. By stressing thematic consistency, and state-of-the-art production techniques, ABS can insure your audience is really impressed with your audio and video presentation.

Post-production

The style of our video production, the look and feel of our cinematic edit capabilities will reflect your creativity, professionalism, and ultimately draw many visitors to watch your video.

With today's growing demand for media access, your video can be quickly distributed via email or uploaded to a web site.

Closed captioning is also available to best serve the deaf and hard-of-hearing communities.

Your video can be used on television, the Internet, or formatted for DVD and displayed at tradeshow.

One of the most cost-effective state-of-the-art solutions today, for many companies, is the pursuit of worldwide syndication for the delivery of products, online courses, services, and much more!

HTML5 Streaming Media

With the rising cost of gasoline prices today, many companies are searching for cost-effective media solutions to increase their exposure and to serve new and existing cliental quickly while reducing company operating and travel expenses.

ABS can provide you with a complete package that includes: video production, hosting, and streaming media services. All you will have to do is just email a video link to a colleague, or upload it to your web site.

So how do you communicate better and faster today?

The answer is easy – Video production services from ABS Technologies.

We capture your world!
