

How To Export Contacts From Outlook Express

Outlook Express is slightly different, but pretty simple also. First, open **Outlook Express** and then go to **File**, choose **Export**, and then choose **Address Book**.

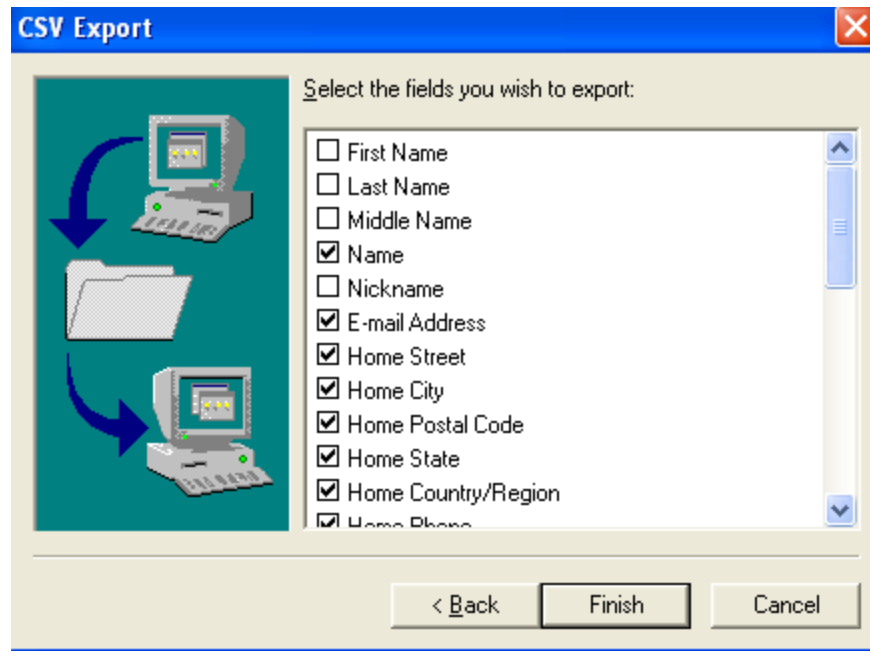

Click on Text File (**Comma Separated Values**) and then click **Export**.

Click **Browse** to specify a location to save the file or type it in manually.

Click **Next** and then choose all of the fields that you want to export for each contact, i.e. First name, Email address, Street, Company, Phone, etc.

Click **Finish** and you are done!
