## PHOTOMONTAGE INSTRUCTIONS

### TO BE COMPLETED BY ABS

PROJECT #: \_\_\_\_\_

DATE: \_\_\_\_\_

1. **Schedule your free consultation** by calling 877-888-8894 or email [sales@absTechnologies.net](mailto:sales@absTechnologies.net). We will help you every step of the way!
2. **Choose your photos** wisely. It is one of the most essential tasks in this process. Make it easier by sorting your favorite and highest quality shots. Do not worry about scratches or other damage; we can probably handle correct this in Photoshop, however, leave out any out of focus or grainy photos.
3. **Number each photo** by taping a sticky note on the back of each photo. *Do not write on photos*, as this will compromise the life expectancy of your photo memory. If you are providing digital files, rename each file with the number (i.e. 027.jpg).
4. **Decide what type of photo montage you would like.** Do you want an emotional and slow moving presentation? Or would you prefer a peppy and uplifting presentation? Perhaps you would like to have a range of emotions within the show, combining songs to set the mood. Deciding this will help you choose your music. We can give suggestions, however choosing music is a very personal decision. You may provide us with your original CD or we will purchase music for you on your behalf. You must own each song for your own personal use to comply with copy write laws. The number of photos you have will determine how many songs you will need. A good rule of thumb is 5-6 seconds of song time per photo. We can usually compress or extend the transitions to make them fit the song, but we may ask you to choose more music if you just have too many photos.
5. **Prepare your materials for shipping.** We recommend that you send your photos via an insured traceable method. Be sure to package them appropriately so that your photos will not become wet or damaged in transit. We will do the same when we ship them back to you at the completion of your photo montage project.

We accept all major credit cards, and PayPal.
