

## INTRODUCING: DIGITAL FAMILY MEMORIALS

We invite you to view the enclosed DVD photomontage, which contains years of movie clips, slides and precious pictures of a departed loved one (my Mom) while she lived. Close family members each received a copy of this DVD as a memorial to her. It has become a great family treasure for us to share her vivid memories.

We offer this same valuable digital service which can be designed exclusively for your Funeral Home. We recommend you include one like this DVD in the funeral package. What a great memorial keepsake to remember a loved one!

As the Funeral Director, all you need to do is have one or two family members provide you with any kind of movie clips, slides and/or photos of the life of the one who passed away. Upon receiving all the information, we will process and transfer it all onto a high-quality DVD photomontage to commemorate the life of the loved one. Each DVD will allow up to two (2) hours of viewing with appropriate added background music. We offer this complete service in a quick, 24-hour turnaround time, which includes pick-up and delivery.

### SERVICES INCLUDE:

- + Quick turnaround time
- + Custom DVD with funeral home branding
- + Digitally scanned photos of your client's life
- + Photomontage with on-screen menu and music

**NOTE: No Contract and No Monthly Fees.**

### BENEFITS INCLUDE:

- + High-quality DVD family memorial
- + Brand recognition on each DVD
- + Traffic surge on funeral home website

Our company, ABS Technologies has added this digital photo service, along with other media services for your convenience. Our goal is to create high-quality photomontages for your Funeral Home to pass on to worthy clients who, I'm sure, will be indebted to you for helping them during their time of grief.

Each personalized product we create for you will include a custom landing page with your funeral home logo, which will complement your existing website and include a link to the photomontage online, which can be connected to the obituary pages on your company website. We use state-of-the-art media equipment, including Digital ICE Technology to provide the best quality images possible.

Additional DVD copies are available with full-color on-disc thermal imaging, which can be viewed on TV and computer. See the attached sheet for more details and price schedule.
