ABS Technologies offer many features to help you establish a professional presence for your business on the Internet.

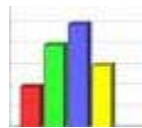

Web Address

A domain name is your first step to the exciting world of online communication and ABS Technologies includes one for free in your package. We also give you plenty of advice on how to choose a great Web Address or domain name.

Customized Email Address

With your domain email account we offer POP3, and POP3S (POP3 over SSL), IMAPs (IMAP over SSL), Blackberry Push Email, SMTP and SMTP (SMTP over SSL), SPAM Filters, Forwarders and Aliases, Autoresponders, Mailing Lists, and much more!

Website Statistics

Monitor your traffic by the hour which includes hits which represents the total number of requests made to the server during a given time period, visits which occurs when some remote site makes a request for a page on the server for the first time, and much more.

24/7 Technical Support

Get the technical support you need when you need it at no extra cost. Our 24/7 Real Person Support is ready to serve your online needs. Be sure to visit our Support page for many helpful interactive tools.

Blogs, Calendars, Maps, and More

Communicate is vitally important with visitors, customers as well as gather information from them. We provide a variety of Web applications that allow you to gather information and much more.

Social Widgets (Facebook & Twitter)

Incorporate Twitter, Facebook, and YouTube on your website to increase traffic and exposure! Enable your visitors to easily recommend your website, making it accessible to an even larger audience.

Custom Control Panel

Your Personal Control Panel includes many common applications, business tools, scripting languages, domain management, advanced tools, file management, search tools, statistics, and much more!

Password Protected

You decide what areas of your website should be visible to the general public and we will create password protected pages that are available for access only by select visitors. This feature is perfect for sharing sensitive information, important documents, etc.

SSL Certificates - Data Encryption

Raise your sites security and secure your data transactions, and identity validation with Secure Socket Layer (SSL) protocol used to secure up to 256-bit Encryption. Secure 1.) Web Form mail; 2.) Mobile Devices; and 3.) Local PC Email Clients].

Download Documents

Save yourself the trouble of sending out large documents, and give your visitors the ability to easily download your brochures, product information, and more in a variety of formats directly online.

Flash Movies / YouTube

Bring your website to life by integrating videos from YouTube or videos we produce exclusively for your business. We offer many Flash Applications to choose from including TV Station, Live Broadcast, Live Presenter, and more.

Optimized For Mobile Websites

Mobile browsing is gaining in popularity today. In response to this growing trend, ABS Technologies offers services to optimize your current website for viewing on many mobile devices, allowing your customers to find you whether they are at home or on the go.
