DVD Duplication

Packaging
and Design

HOW DO I BEGIN?

1. Tell us about your project
2. Select a product and/or service
3. Review our price quotation

ABS Technologies provides high-quality media production, editing, transfer, and duplication services.

Media Transfer Services

Media such as film, VHS and 8mm tapes deteriorate every year even if you do not view them, and your precious memories meticulously caught on tape will someday be unplayable. The average life expectancy of tapes is about 10 to 15 years.

DVDs however, will last hundreds of years, and because they contain digital information, they can be played millions of times without any degradation or loss in audio or video quality.

CD / DVD Duplication Services

Our CD, and DVD duplication, and printing suite have been geared to the highest quality water-proof finish in the fastest possible turnaround time. Our high-quality full color thermal print offers vivid color reproduction and resolution.

Please remember to ask our sales representative about our new 24K Gold Archival Discs, with hard coated scratch resistant bottoms which are the best choice for long term storage of mission critical information and images.

Special rates for churches, ministries, and non-profits!

SHIPPING SERVICES

Simply ship your media to ABS and we will ship them back to you after they have been duplicated using one of two shippers.

Test Drive Our 2GB MP3/MP4 Player

Take your entertainment with you! Tote around everything including movies and music with this low-cost Portable Media Player. Call for Details.
