

The solution for all your web hosting needs.

Our state-of-the-art data center features direct fiber optic connectivity to eight major Internet backbones, non-interruptible power from multiple UPS systems and a diesel generator, 24-hour surveillance and a sophisticated climate-control system for an ideal hosting environment.

Our facility is engineered to provide the highest levels of connectivity, security and reliability for hosting, and provides access to backbone providers such as AT&T, Time Warner, Level 3, MCI, XO Communications, SBC, Williams and ICG. This diversity of backbone providers allows us to provide multi-homed bandwidth for continuous connectivity.

From personal sites for sharing photos to professional websites with critical web applications, our clients rely on us to provide 99.99% uptime. We guarantee it.

All our web hosting packages provide you with a custom control panel to manage your site with features such as:

99.99% Up Time Per Year

7/24 Support Service
