Why do I need to convert my audio and or video tapes?

Preserving the most precious moments in life does not have to be expensive. Since the popularization of the audio recorder and video camera, many people have enjoyed the convenience of capturing these life time memories on tape. Unfortunately the commonly used Cassette and VHS tapes have a *short-term* life expectancy. The quality of the sound and or picture will deteriorate over time due to friction between the player head and the tape. Other factors such as humidity and temperature can also affect the quality of the tapes.

You certainly do not want to see your happy memories get worn out! Whether it's a corporate training video, your kids growing up, that once in a life-time wedding, or that unforgettable vacation with your loved ones, it deserves to be preserved.

Turn Over ⇨

VHS to DVD conversion is the most common form of analog to digital video conversion. It ensures your videos will last a lifetime. If you have movies on VHS or other video tape formats, converting them from VHS to VCD can save you hundreds, even thousands of dollars in replacement costs. And do not let those home videos degrade away, transfer them to digital video and preserve your memories with ABS Technologies today!

Audio cassette tapes to MP3 or WAV files can be quickly transferred from your old cassette music collection or your children's educational tapes into a permanent digital record.

Video CD's (VCD for short) is the most economical way to accomplish this goal. Once encoded onto VCD's, you can practically play your homemade video as many times as you want. VCD's can also be played on your computer, video CD player, or DVD player. Windows 97/98/ME/XP has built-in Active Movie software for you to watch your VCD's.

So don't delay, call ABS Technologies today at 1-877-888-8894 to talk about your media conversion project. You will be glad you did!

Reel-To-Reel: Today's Digital Re-mastering technology can make yesterday look and sound great! We scan your film frame-by-frame to convert old 8mm, Super8, and 16mm movies to video and preserve them for a lifetime of memories. Background music and titles can also be added for an additional cost.

Remember, film degrades every time you play them and become brittle overtime if they are not stored properly. On the other hand, DVDs can be played thousands of times without any change in quality.

So what are you waiting for? Give your children and grandchildren their own DVD treasure today. It will truly become a favorite keepsake gift for many years to come.

See terms and conditions on the next page:

TERMS AND CONDITIONS

By receiving ABS Technologies terms and conditions you acknowledge that this is a binding legal agreement between ABS Technologies and users of media to Digital conversion services provided by ABS Technologies.

Media to Digital conversion and duplication service offered on the web site www.absTechnologies.net is provided without warranties of any kind, whether expressed or implied to the fullest extent permissible pursuant to applicable law. ABS Technologies disclaims all warranties, expressed or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose. ABS Technologies does not represent or warrant that the services provided will be error-free or that defects will be corrected. ABS Technologies does not make any warranties or representations regarding the use of the materials provided in terms of their correctness, accuracy, adequacy, usefulness, timeliness, and reliability or otherwise.

Limit of liability

ABS Technologies is not responsible for late, lost, damaged or misdirected mail. ABS Technologies does not warrant that Media to Digital conversion services will fit all users' particular purposes, and is not liable for any damages or losses of any kind to the original media provided by the client. Liability of ABS Technologies is limited to replacement of such tape with blank video/cassette tapes of the same kind only.

By submitting an order the client declares and warrants that all materials provided for conversion and/or duplication are not in violation of any copyright laws. The client will indemnify and hold ABS Technologies harmless in respect to any claims or demands by any third party that infringes upon any Copyright law. The video materials submitted were either created by the client or has the right to permit ABS Technologies to perform duplication services, or the client has the permission of the copyright owner to duplicate video materials and written release form is provided.

Acknowledgement

Having read and understood this agreement, you acknowledge its priority to any order, engagement or advertisement, and agree to its terms.
